From Dennis Lewis

I met Warren through my wife, who is an acupuncturist and nurse, and attended a couple of his workshops in the San Francisco Bay Area. We became fast friends, and I have wanted to bring him to Arizona for some time. I am thus happy to be making his wonderful work available through our new desert home/center. Warren is a man of great integrity and a wonderful healer.

Warren Grossman, Ph.D., is a graduate of Kent State university & The Gestalt Institute of Cleveland. He practiced conventional psychotherapy until 1987 when a trip to Brazil left him desperately ill and unable to work for a year. He spent this time of convalescence observing nature's energy & realizing that it was the source of healing, available to all. Dr. Grossman is the author of "To Be Healed By The Earth".
